

Pressure Switch Series YLK35-PNP、NPN

Features

High stability and reliability, Pressure interface can rotate 330°, Digital calibration system, 4 Bits LED display, pressure value presupposed pressure switch point and switch point action delay function, Equipped with node action leds, convenient for observation, Key adjustment and the scene setting various parameters, easy to operate.

Specifications

Electronic pressure switch	
Type	YLK35-PNP、NPN
Advantage	Key setting; The display is intuitive; Easy to replace
Display	4 digit nixie tube
Stability	≤0.2%/year
Accuracy	±0.1% (Display) ; ≤±0.5% (Control)
Power	24VDC±20%
Load capacity	<24V 1.2A
Temp	-30~+70°C (Surround) ; -40~+85°C (medium)
Switch life	> 1million times
IP rating	IP65
Control	0~600bar`
Display	-1999~9999
Max power	<3W
Connection	Five-pin aviation plug
Out put	PNP NPN Analog
