

Capacitance Level Sensor YW02-02

Product features

- Added Bluetooth mode in addition to digital and analog output signals
- Fast installation and setup without wiring
- Can be used as soon as it is connected to a power source
- Shock-proof outer shell protection
- Can use mobile phones to configure and debug
- Explosion-proof
- Can accommodate a large part of the market communication equipment
- Sensor length can be cut according to the height of the oil tank
- Good measurement continuity, strong stability, long life

Specifications

Type	YW02-02
Input	DC5~36 V
Working current	≤5 mA
Range	0~1000 mm
Accuracy	±1% FS
Resolution	0.5 mm
Communication	BLE5.0
Communication distance	50 m
Installation	Top-mounted
Fixed	Five-hole flange
